DAILY ONLINE ACTIVITIES SUMMARY

Date:	19/5/2020		Name:	Divya C H	
Sem & Sec	8 th Sem		USN:	4AL16CS033	
Online Test Summary					
Subject	Big Data Analytics				
Max. Marks 30			Score 21		
Certification Course Summary					
Course	Introduction to Ethical Hacking				
Certificate Provider		greatlearning.in	Duration		6 hrs
Coding Challenges					
Problem Statement: 1)Add letters to given letter/word and fine the shortest palindrome.2) To check if given linked list is palindrome or not					
Status: Completed					
Uploaded the report in Github			Yes		
If yes Repository name			Daily_report		
Uploaded	the repo	rt in slack	yes		

Online Test Details:

Certification Course Details:

Coding Challenges Details:

Program 1:

```
package shortestpalindromeexample.java;
import java.util.Scanner;
public class ShortestPalindromeDemo{
public static String shortestPalindrome(String str) {
int x=0:
int y=str.length()-1;
while(y>=0){
if(str.charAt(x)==str.charAt(y)){
if(x==str.length())
return str;
String suffix = str.substring(x);
String prefix = new StringBuilder(suffix).reverse().toString();
String mid = shortestPalindrome(str.substring(0, x));
return prefix+mid+suffix;
public static void main(String[] args) {
Scannerin = new Scanner(System.in);
System.out.println("Enter a String to find out shortest palindrome");
String str=in.nextLine();
System.out.println("Shortest palindrome of "+str+" is "+shortestPalindrome(str));
}
```

Program 2

```
import java.util.Stack;
class Node {
int data;
Node next:
Node(inti)
        this.data = i;
        this.next = null;
};
class Main
public static boolean isPalindrome(Node head)
// construct an empty stack
Stack s = new Stack<>();
Node node = head;
while (node != null) {
s.push(node.data);
node = node.next;
        node = head;
        while (node != null)
                int top = s.pop();
                if (top != node.data) {
                         return false;
                node = node.next;
        }
        return true;
public static void main(String[] args)
        Node head = new Node(1);
        head.next = new Node(2);
        head.next.next = new Node(3);
        head.next.next.next = new Node(2);
        head.next.next.next.next = new Node(1);
```

Program 3

```
#include<stdio.h>
#include<math.h>
int max(int num1, int num2)
{
  return (num1 > num2) ? num1: num2;
}
int countWays(int arr[], int n)
 {
    int max_val = 0;
    for (int i = 0; i < n; i++)
      max_val = max(max_val, arr[i]);
    int freq[20]=\{0\};
    for (int i = 0; i < n; i++)
      freq[arr[i]]++;
    int ans = 0;
```

```
ans += freq[0] * (freq[0] - 1) * (freq[0] - 2) / 6;
  for (int i = 1; i \le max_val; i++)
    ans += freq[0] * freq[i] * (freq[i] - 1) / 2;
  for (int i = 1; 2 * i <= max_val; i++)
    ans += freq[i] * (freq[i] - 1) / 2 * freq[2 * i];
  for (int i = 1; i \le max_val; i++) {
    for (intj=i+1;i+j \le max_val;j++)
      ans += freq[i] * freq[j] * freq[i + j];
  }
  return ans;
int main()
  int arr[]={1, 5, 3, 2};
  int n = sizeof(arr)/sizeof(int);
  printf("%d",countWays(arr, n));
  return 0;
```

}

{

}
